Individual Contribution Statement

Name:	Damba Alex
Registration number:	S25B38/037
Access number:	B35393
Course:	DSC2107 Data Mining and Wrangling
Project:	Seven-Day Product Mining and Analysis of Jumia Nigeria

I contributed to coordinating and integrating the final stages of the project. I helped bring the accepted daily datasets together, checked that the combined seven-day cleaned file contained the expected dates and observations, and supported verification of the SQLite database. I also worked on the final USD-based analysis, reviewed notebook outputs and helped prepare the final written report. My role included checking that the report used the verified results, explained the Kenya–Nigeria comparison carefully, and remained suitable for a Year 2 Semester 1 assignment. I also helped organize the submission files so that the report, figures and contribution statements could be opened without missing paths.

I confirm that this statement reflects my contribution to the group project and that I can explain the work described above.

Name:	Mukisa Eric Williams
Registration number:	S25B38/025
Course:	DSC2107 Data Mining and Wrangling
Project:	Seven-Day Product Mining and Analysis of Jumia Nigeria

I contributed to the reconnaissance and collection-method review. I helped examine how the Jumia catalogue pages were structured and how product cards, category pages and pagination could be handled using Python Requests and Beautiful Soup. I also supported review of the scraper and parser fields, including product names, brands, prices, old prices, discounts, ratings, review counts and URLs. My contribution included checking that the documented approach respected the website rules, used controlled request delays and avoided collecting private information. I also supported the data dictionary and helped confirm that the selected fields were understandable and useful for the final analysis.

I confirm that this statement reflects my contribution to the group project and that I can explain the work described above.

Individual Contribution Statement

Name:	Lwanga Darren Jordan
Registration number:	S25B38/022
Course:	DSC2107 Data Mining and Wrangling
Project:	Seven-Day Product Mining and Analysis of Jumia Nigeria

I contributed to testing and validation of the data-processing workflow. I helped review the unit tests used for the scraper, cleaner and database loader and checked that duplicate product-date observations were rejected. I also supported checks for missing values, timestamp consistency, URL normalization and database integrity. My contribution included reviewing the outputs produced after daily collection and confirming that raw data remained separate from cleaned data. I also helped check the repository and final files so that unnecessary temporary content did not interfere with the project deliverables.

I confirm that this statement reflects my contribution to the group project and that I can explain the work described above.

Individual Contribution Statement

Name:	Bwambale Bisogho Sedrack
Registration number:	S25B38/038
Course:	DSC2107 Data Mining and Wrangling
Project:	Seven-Day Product Mining and Analysis of Jumia Nigeria

I contributed to the daily data-collection activities and project documentation. I supported an assigned daily run by following the required order of checks, collection, validation, cleaning and database updating. I helped review the accepted output for duplicates and collection errors and supported documentation of the results in the README and group workflow. I also contributed to explaining how members should run the project consistently, preserve raw data and use checkpoints when a normal collection interruption occurred. This helped make the workflow easier for other group members to follow and repeat.

I confirm that this statement reflects my contribution to the group project and that I can explain the work described above.

Individual Contribution Statement

Name:	Masaba Carl Michael
Registration number:	S25B38/016
Course:	DSC2107 Data Mining and Wrangling
Project:	Seven-Day Product Mining and Analysis of Jumia Nigeria

I contributed to daily collection support, data-quality reporting and database verification. I helped carry out and review an assigned collection run, checked the saved row counts and category coverage, and supported confirmation that the accepted data contained no duplicate product identifiers for that run. I also contributed to quality-report documentation and helped verify that the cleaned daily output was loaded correctly into the combined SQLite database. My work supported the final multi-day dataset and helped ensure that the database observations, collection dates and integrity checks were consistent before analysis.

I confirm that this statement reflects my contribution to the group project and that I can explain the work described above.
